

Job Title – Solution Architect**Job ID – 167****Division – Hyperion Group IT****Location – London****Role Definition**

The Solution Architect will focus on converting requirements into the architecture and design that ultimately constitute the blueprint for the solution. The Solution Architect will also be expected to understand the business strategy and build a technology plan which brings Hyperion Insurance Group's systems into alignment with those objectives.

Key Responsibilities / Accountabilities

- Provide architectural input into Roadmaps/Blueprints
- Confidently lead discussions with key business stakeholders
- Design solution models to meet business objectives
- Lead preparation of the digital technology blueprint, supporting technical documentation and technology roadmap, as part of our digital transformation strategy and implementation projects
- Takes full responsibility for the balance between functional, non-functional, service quality and systems management requirements
- Maintains relationships with strategic vendors to maintain knowledge of solutions and technology and drive value
- Able to seed or self-start the technical aspects of small scale projects working with business analysts, project managers, and engineering teams
- Support incubation of new technologies and common platforms from business case development to design to operate

Skills and abilities needed to perform role

- Architecting solutions in Azure, and having a deep understanding of the Azure Product Suite (Compute, Networking, Storage, Web + Mobile, Containers, Databases, Analytics, AI + Machine Learning, IoT, Integration, Security + Identity)
- Development background; .NET, C#, SQL, HTML, CSS, JavaScript
- XML, JSON, and REST web services
- Agile delivery methodologies such as scrum
- Knowledge of some of the Azure Products suite

Knowledge and Experience

- Insurance domain experience (preferable) – 5 years minimum with experience in at least two of the following areas (Retail, London Market, MGA's)
- Implementation of eTrade / ecommerce platforms within the Insurance Sector
- Knowledge of Insurance policy administration
- Knowledge and experience of all phases of the SDLC and full lifecycle implementations using traditional waterfall / iterative methodologies and more modern agile ones

- DevOps implementation
- Knowledge of Business Intelligence / Data Warehousing technologies

The company operate a stringent employee referencing and verification process when we on board new joiners (temporary or permanent), which means if you are offered a role with us we will ask you to make honest and open declarations about your past employment, qualifications, financial history and credit/debt history. It can mean that offers of employment may be withdrawn if information is found which is not satisfactory to us.

Any unsolicited CV's/candidate profiles submitted through our website or to employees of Hyperion Services Limited outside of the HR function are considered property of Hyperion Services Limited and are not subject to payment of agency fees. In order to be an approved Recruitment Agency/Search Firm for Hyperion Services Limited, a formal Hyperion Services Limited agreement must be signed by an authorised member of Hyperion Services Limited HR function.
